What?

Why?

How?

Questions?

- 1 Get list of URLs from Spotify Library
- 2 Use URLs to get a list of song titles and artists
- 3 Use list of titles and artists in conjunction with another web scraper to download the songs off of a site like mp3ify
- 4 (Possibly figure out how to rename the files with a program too? Who Knows?:p)

A note on Web Scrapers

What?

Why?

How?

Questions?

A web scraper is any program that is used to get info off of internet

There are also forms of web scrapers called web crawlers used to check that links are all working and stuff on big sites.

These kinds of programs are also the reason that we have captchas
